What is Clothing and Textiles?
Clothing serves to protect us from the environment, and to express ourselves through various elements such as fashion, color and design. As appearance becomes more important in our society, understanding clothing and fashion helps us improve the quality of our life and relationships with others. Clothing and Textiles focuses on the scientific study and analysis of the materials for clothing, clothing design, construction methods and distribution processes to achieve integrated knowledge. The Clothing and Textiles major seeks to produce capable, creative scholars and professionals performing with excellence in academic and private sectors through teaching interactions between human beings and clothing environment, as well as skills, knowledge and creativity.

Clothing and Textiles at Kyung Hee
The Clothing and Textiles major at Kyung Hee University is a nationally-ranked program offering the best in teaching, faculty expertise, and research. The baccalaureate curricula provide students with knowledge and skills in apparel design, historic costume, textiles, social-psychology of clothing, clothing construction, and fashion merchandising. Besides the course work, students have opportunities for professional growth and development through participating in a number of exhibits held within the major as well as entering other major competitions. As a graduation project, students are required to participate in a fashion show to apply their skills, knowledge and creative ideas. The Clothing and Textiles major at Kyung Hee also emphasizes responsible citizenship and cooperative personality to contribute to society.
